Part of Paper No. 03242004

Continuation of 3. Applicant's reply has overcome the following rejection(s): 35 USC, 112, second paragraph, with respect to the recitation of "modulating".

Continuation of 5. does NOT place the application in condition for allowance because: of the reasons of record. Further, it is noted that applicant appears to argue limitations not claimed (e.g. functional properties, structural properties) with respect to the rejection under 35 USC 112, first paragraph. With respect to the prior art as pointed out previously, it does not appear that the claim language or limitations result in a manipulative difference in the method steps when compared to the prior art disclosure where the prior art teaches methods of inhibiting the same or nearly the same anti-alphaD antibodies to inhibit immune or inflammatory conditions in vivo.
